

OKTAVIA CHAIR

THE MUSIC CHAIR THAT GROWS WITH THE CHILD

Oktavia is a chair developed specifically for young musicians. The chair has a unique design which ensures an ergonomically correct sitting- and playing position for children of all ages in order to prevent and alleviate back injuries. The seat is tilted slightly forward and is adjustable in height due to a unique stepless mechanism. When the seat is tipped forward the mechanism will lock the seat in place, which enables children to adjust the chair themselves.

Oktavia is a well thought-out product in relation to handling and storage. The chairs are lightweight which means they are easy to lift and move, even for a child. Furthermore, the design enables tight stacking which in turn means efficient use of storage space.

Oktavia Chair is designed by architect and musician Camilla W. Nørgaard. It is produced in Denmark using eco-friendly materials and processes.

OKTAVIA CHAIR

THE MUSIC CHAIR THAT GROWS WITH THE CHILD

PRODUCT FEATURES

- Grows with the child
- Stepless adjustment
